Hi Nate--

I'm afraid I don't have much info for you. Regarding the training times, review of historical information about the mine will be a part of the independent review by the Department of the Interior (DOI). Details of the review will be released by DOI when they become available. Regarding the visitors' log, since this information has not been released, unfortunately we do not have it available to share as part of response activities. It may become available in the future.

Let me know if I can help with anything else.

Jennah Durant
